

This is what you must prepare in order to work with GMOs under contained use

As the legal entity, you are responsible for the execution (or delegation) of all preparatory steps. You can get start all necessary forms at the same time, but you may not start any GMO work until all permits have been issued.

Submit a notification or request a permit

'I have to submit a notification or apply for a permit for my activities with GMOs and for that I first need to carry out a risk assessment.'

You can find more information about the procedural handling of your request or notification on the webpage [procedures](#).

Assign a biological safety officer

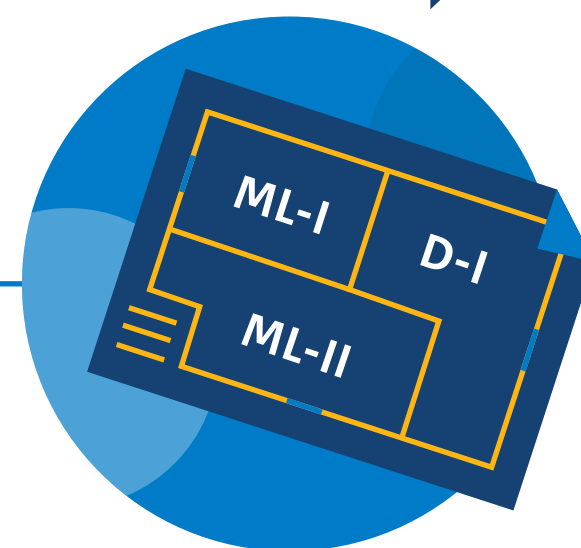

'As a BSO I get the authorizations I need have to be able to ensure all GMO activities are performed safely.'

You can find more information about the BSO tasks and authorizations on the webpage [BVF](#).

Request an environmental permit

'I'm requesting an environmental permit, in which I include a clear map of the premises.'

You can find more information about requesting an environmental permit with your local environmental agency on the webpage [omgevingsvergunning](#).

Internal organization

You need to ensure that you have a transparent and up-to-date administration of all your GMO activities.

You can find more information about requirements of the internal organization on the website under [internal organization](#).
